

**Gold Karat Rating**

Karat	Gold Content	Typical Use	Comment
8	Up to 33%	Souvenirs	Not too common
10	Up to 41%	Jewelry	Very common
14	Up to 58%	Jewelry	Most common
16	Up to 67%	Dental	Alloyed with hardeners
18	Up to 75%	Higher end jewelry	Common
22	Up to 92%	High end jewelry	Less common - Very soft

**Notes:**

- Gold karat rating is usually stamp in gold item. Stamp may be faded
- If not stamped, most likely not gold
- EP means Electro Plated - Basically thin gold coated
- GF means Gold Filled – Basically thick gold coated
- Use a magnet. If item is magnetic, it is not gold

**Platinum Purity**

- 95% Platinum is 95% platinum 5% iridium (less common)
- 90% Platinum is 90% platinum 10% iridium (more common)
- Almost always stamped in the item
- Not magnetic

**Silver Purity**

- Sterling silver is from 80% to 95% pure silver. Most commonly 0.925 (92.5%) pure silver
- Usually stamped in the item
- Not magnetic
